

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

All through their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could quickly and securely lift individuals in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a partnership with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The company incorporates many of the simple design elements of that original lift into existing versions.

JLG lift trucks have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into many markets worldwide and develops new products to make sure customers are capable of being more efficient and perform in the workplace within a safer environment.
